

GYNOLACTOSPEY

Instructions for the medicinal product

Trade name: Gynolactospey.

International Nonproprietary Name: Lactobacillus.

Dosage form: soft gelatin capsules for vaginal use.

Composition: Each soft gelatin capsule for vaginal use contains:

Lactobacillus spores 600 million.

Pharmacotherapeutic group: antiseptic.

ATC Classification: G01AD01.

Pharmacologic property:

Pharmacodynamics:

Lactic acid is a natural product of the vital activity of lactic acid bacteria of the vagina, provides the pH of the vaginal secretion in the range of 3.5–4.5.

Suppositories with lactic acid help restore and maintain normal pH and flora of the vagina, suppress the growth of acid-sensitive pathogenic and conditionally pathogenic flora.

Lactic acid creates an acid reserve to correct the shift of pH observed in vaginal infections to the alkaline side.

Promotes increased natural protection of the vagina from genital infections.

Pharmacokinetics:

There is no information on pharmacokinetics.

Indications for use:

- Normalization of impaired microflora and pH of the vagina;
- Prevention and treatment of diseases caused by the imbalance of the vaginal microflora, including with bacterial vaginosis (as part of complex therapy), nonspecific vulvovaginitis, hormonal vaginitis;
- correction of local immunity in the complex therapy of acute and chronic diseases of the female genital sphere;
- correction of urinary tract dysbiosis, including inflammatory disease of the urethra with infectious and non-infectious nature;
- Prevention of infections after gynecologic surgery, preparation for gynecologic surgery;
- Prenatal preparation of pregnant women with pelvic inflammatory disease in risk degree.
- Resuming of physiologically normal microflora after topical or system treatment by antibiotic drugs.

Contraindications:

- Hypersensitivity to the components of the drug;
- Candidiasis vulvovaginitis;
- Children's age (under 18 years).

Pregnancy and Nursing Mother:

Medication can be used during pregnancy and lactation.

Dosage and directions for use:

Intravaginal.

Before use, the suppository is freed from the contoured package. One vaginal suppository is inserted into the vagina, lying on the back with slightly bent legs.

With therapeutic purpose: 1 vaginal capsule twice daily (morning and evening) for 7 days. If necessary, the course of treatment can be extended.

For prophylaxis: 1 vaginal capsule 1 time a day at bedtime for 7-14 days.

Treatment and / or prevention should be performed immediately after menstruation.

Side-effects:

Possible allergic reactions, itching; in rare cases, burning in the vagina, after the drug is withdrawn.

Overdose:

No cases of drug overdose have been reported.

Drug interaction:

There is no information.

Cautions:

If burning and itching occurs, it is recommended that a check be done to exclude the fungal infection of the vagina.

Gynolactospey capsules is for vaginal use only.

Do not use if suppository wrapper is missing or damaged.

Presentation:
